

"Success is liking yourself, liking what you do, and liking how you do it."

– Maya Angelou

Why is Learning Style Critical for Stream Selection?

Success in academics and career isn't just about what you learn—it's about how you learn. Your learning style affects how you absorb information, manage time, retain knowledge, and tackle challenges. It shapes your study habits and confidence. Understanding your preferences helps create personalized strategies for more effective, enjoyable learning. We used our model, AuroTri, to identify 14 key subfactors across five core areas: input style, study environment, structure preference, learning pace, and personal management.

ALM report covers 'Learning Style', which is one of the seven components of our proprietary Auro Student Diagnostic Test, designed to help students understand themselves better and make informed stream and career choices.
